Bath & Soul

Established in 1992 on the Gold Coast in Queensland, Australia. We manufacture a large range of unique soaps and body products which we supply to skincare companies, resorts and businesses throughout Australia and overseas. Our soaps and body products are handcrafted from natural ingredients so they are gentle on the skin, artful to the eye, invigorating to the senses and kind to the environment.

## **Private Label Manufacturing**

We specialise in producing custom made soaps, bath bombs and other products for clients. We work with the client to develop and create unique soaps and labels to meet their particular needs. These can be small quantities of boutique type soaps, small guest soaps and body-care products for resorts and hotels or large quantities of soap made to specification for skincare companies and franchise chains. We export custom made products to countries such as Japan, India, United States, England, New Zealand and Denmark.

Our handmade soaps & body-care products are created in our factory on the Gold Coast in Australia using only the finest ingredients that nature has to offer ~ coconut and palm oil, jojoba & almond oils, olive oil, quality essential oils, french clay powders and botanicals.

## **Why choose a natural handmade soap?**

Handmade soap is created using a very different method from commercially processed soap. Most mass produced commercial soaps have the natural glycerine removed and contain detergents, foaming agents, synthetic perfumes and a whole list of unpronounceable chemicals. No wonder they dry and irritate skin!

Our unique natural and handcrafted soaps are made from pure vegetable and essential oils. The ingredients have been slowly hand blended at low temperatures to preserve the vital nutrients and skin care properties of the plant oil ingredients. They cleanse, tone and nourish the skin without causing dryness.

Try our soaps and you'll feel the difference immediately. The rich creamy lather feels delicious and the scent of pure essential oils delight the senses. Your skin is precious and will benefit from pure natural cleansing.

## **Feel the difference!**

Many mass produced soaps and skincare products are full of chemical preservatives, detergents and other artificial additives. A product only needs to have 5% natural ingredients included for them to be called a 'natural' product! We only use pure ingredients in our soaps with no animal products, chemical preservatives or foaming agents.

People often comment they can't use soaps because it dries and irritates their skin. However, once they try our natural soap and feel the difference for themselves they are often astounded at the creamy rich lather and how soft and smooth it leaves their skin. We know that once people try our soap, they are converted and find it difficult to use mass produced soaps again. We have customers who have been using our soaps since the business began in 1992.

We have developed our own brand name of "Bath & Soul" to enable clients to purchase our products already packaged. As well as our beautiful soaps we have a growing range of body-care products to pamper your skin. We have a factory outlet shop at our premises at Miami on the Gold Coast and welcome you to visit us.
